

You are invited to attend an educational program entitled: **Nutritional Strategies for Low-Birth-Weight Infants**

LEARNING OBJECTIVES

Dr. Neu discusses current strategies for prevention and treatment of growth failure in preterm infants. He will describe how past and current nutritional strategies may relate to the development of various adverse outcomes such as bronchopulmonary dysplasia, retinopathy, intestinal feeding intolerance, and later metabolic syndrome. Dr. Neu also provides a brief discussion of how emerging technologies such as artificial intelligence and integrated multiomics may lead to precision-based preventative and therapeutic nutritional strategies.
