

You are Invited to Attend an Educational Program Entitled

The Art and Science of Fortifying Milk for Preterm Infants: an evidence-based blueprint

Learning Objectives:

- Understand the nutritional requirements of extremely preterm infants and the role of human milk fortification in meeting those needs.
- Identify the methods and strategies for fortifying human milk with essential nutrients to optimize growth and development in extremely preterm infants.
- Evaluate the evidence-based benefits and potential challenges associated with human milk fortification in the care of extremely preterm infants, including considerations for individualized feeding plans and monitoring for optimal outcomes.
